For over 30 years French manufacturer MAFDEL has developed a **wide range of thermo-weldable conveyor belts** for industrial handling applications. Our technical teams are at your disposal to **explore your various technical challenges** and propose **customized solutions to fully meet your needs.**

CONFIGURATION

HORIZONTAL CONVEYOR

BIDIRECTIONAL CONVEYOR

FLIGHTED AND SIDEWALL CONVEYOR

SWAN-NECK CONVEYOR

TROUGHED CONVEYOR

ADVANTAGES

Our positive drive homogeneous conveyor belts combine all the **advantages of modular belts and solid conveyor belts without the hygiene issues.**

Made of polyurethane or polyester elastomer, these belts are suitable **for most handling applications** in a variety of industries, particularly in the **food-processing industry.**

OPTIMIZED OPERATION

- No risk of slippage, even in greasy and humid environments
- Belt operates without tension, reducing the stress on the conveyor's mechanical components: shafts, anti-friction bearings, roller bearing, etc.
- No need for tensioners
- Lightweight
- Silent operation
- High abrasion and tear resistance
- For belts fitted in pairs, the positive drive ensures synchronized operation
- Fully moulded teeth

OPTIMAL HYGIENE LEVEL

- Fully EC-FDA compliant
- Solid impervious and rot-proof belt
- Labour and water saving
- Resistant to all common food industry chemicals including solvents, oils, greases...
- Suitable for scraper applications

ADVANTAGES

REDUCED PRODUCT CONTAMINATION

- Reduced risk of bacterial growth
- No fabric contamination removing the risk of fraying
- No detachable parts
- Reduced contamination risk

LOWER OPERATING COSTS

- Long service life
- Quick and easy to clean without dismantling
- Significant reduction in water and detergent consumption
- Low maintenance costs

	MODULAR BELT	HOMOGENEOUS CONVEYOR BELT	POSITIVELY DRIVEN CONVEYOR BELT
Hygiene and cleanability	-	+	+
Durability and impact resistance	-	+	+
Lower consumption of water and detergents	-	+	+
No slippage	+	-	+
Belt weight	-	+	+
No belt tensioning system	+	-	+
Reduced stress on conveyor components	+	-	+
Suitable for scraper	-	+	+
Troughing application	-	+	+

CHARACTERISTICS

Our positive drive belts comply with the **most stringent international standards**, and help maintain an optimal level of hygiene to **meet the HACCP* requirements**, in the following fields:

Poultry

Meat

Fish

Cheese dairies

Fruit

Vegetables

Bakeries- Industrial
pastry-making

Ready meals

Frozen foods

*HACCP : Hazard Analysis Critical Control Point

CHARACTERISTICS

DEL/DRIVE®

Positive drive

Direct retrofit
on modular applications

Teeth over the entire width

Operation without tension

POSITIVEBELT®

Self-tracking positive drive

Perfect tracking

Double rows of teeth

Operation without tension

DEL/SYNC®

Fully synchronous drive

Accurate positioning

Centrally positioned teeth

Tensioned operation

DEL/DRIVE® 50

DEL/DRIVE® 50

The DEL/DRIVE® positive drive belt meets the **most stringent standards of hygiene** and is **the ideal alternative to conventional modular belts**. It replaces a modular belt without any modifications. It is either driven on a sprocket or a motorized drum.

The DEL/DRIVE® belt is installed **without tension**, thereby reducing stress on the conveyor's mechanical components: shafts, anti-friction bearings, roller bearing, etc. DEL/DRIVE® can be configured with flights, sidewalls or other profiles (see page 18).

The DEL/DRIVE® comes in several versions to meet all needs:

The DEL/DRIVE® 50 belt in polyurethane is both flexible and has high tensile strength. It is the ideal solution for the conveyance of light to medium-weight loads.

The DEL/DRIVE® 50AM belt has the same characteristics as the DEL/DRIVE® 50 belt plus an infused antimicrobial treatment. DEL/DRIVE® 50AM improves food safety by inhibiting the proliferation of bacteria.

This prevents the contamination of transported products. A further benefit is the reduction of odours and cleaning cycles.

The DEL/DRIVE® 50AMEM belt has an infused antimicrobial treatment and an embossed top surface that reduces adherence of the products on the belt.

The DEL/DRIVE® 50H belt in polyester elastomer is recommended for medium to heavy loads and can be used with long centre-to-centre distances. In certain cases, its high tensile strength and low friction coefficient permits a build-up of transported products. It can withstand higher peak temperatures, depending on the load.

The DEL/DRIVE® 50EMLT belt is specially designed to operate in very low ambient temperatures. Its embossed top surface facilitates the conveyance of frozen products.

The DEL/DRIVE® 50/25 belt has 50mm drive teeth on one face, and 25mm drive teeth on the other allowing one side to drive and the other to act as low flights for increased grip.

DEL/DRIVE® 50

SPROCKETS AND IDLER WHEELS

REFERENCE	PRODUCT	MATERIAL	NUMBER OF TEETH	OUTER DIAMETER	SQUARE BORE	WIDTH (mm)
P50WUN06	Sprocket	HDPE	6	95	40	32
R50WUN06	Wheel	HDPE	-	83	40	32
P50WUN08	Sprocket	HDPE	8	128	40	32

P50WUN12	Sprocket	HDPE	12	193	40	32
R50WUN12	Wheel	HDPE	-	181	40	32

Flanged sprockets and wheels are available on request.

The standard sprockets we offer have a square bore for a 40x40 mm drive shaft.

They can be mounted on other shafts with special adapters.
Please enquire for any other dimensions of round or square shaft.

On a smooth driving drum, sprockets can be mounted on bushings or a driving drum with profiled polyurethane lagging.

DEL/DRIVE® 25

"POSITIVE DRIVE ON SMALL PULLEY DIAMETERS"

		DEL/DRIVE® 25	
Reference		DDB25B5.3	DDB25B5.8
Material	Polyurethane		
Colour	Blue	Blue	Blue
Top surface	Smooth	Smooth	Smooth
Hardness	95 ShA	95 ShA	95 ShA
Pitch (mm)	25.3	25.3	25.3
Thickness (mm)	1.7	2	2
Overall thickness (mm)	5.3	5.8	5.8
Max. width (mm)	530	1200	1200
Weights	2.8 kg/m ²		
Min. pulley diameter (mm)	48	56.7	56.7
Min. pulley diameter - back flex (mm)	50	60	60
Temperature range	-20°C to +60°C		
Traction force at 2% elongation	25 daN for a width of 100 mm	30 daN for a width of 100 mm	30 daN for a width of 100 mm
Friction coefficient			
On HDPE bed	0.2		
On stainless steel bed	0.55		

The DEL/DRIVE® 25 belt is flexible, light with a small pitch and thickness for smaller diameter sprockets. It thus reduces the space requirements of conveyors and facilitates the transfer of transported products.

*Sprockets on demand.

POSITIVEBELT®

The positive drive thermo-weldable POSITIVEBELT® offers **exceptional guidance thanks to the dual row of teeth**.

Its **perfectly smooth top surface** makes cleaning easier and maintains an **optimal level of hygiene**. The POSITIVEBELT® can benefit of an **antimicrobial treatment**. This treatment improves food safety by inhibiting the proliferation of bacteria, and prevents the contamination of transported products. A further benefit is the reduction of odours and cleaning cycles.

The POSITIVEBELT® has **high abrasion and cut resistance**, thereby **ensuring prolonged service life**.

The belt is mounted **without tension**, reducing stress on the mechanical components. It is driven by sprockets generally mounted on a square shaft or a smooth driving drum fitted with special sprockets.

The idlershaft is fitted with disks. Wheels can be added between the sprockets and the disks.

Profiles or sidewalls can be added (see page 18).

The standard sprockets we offer have a square bore for a 40x40 mm drive shaft.

They can be mounted on other shafts with special adapters.
Please enquire for any other dimensions of round or square shaft.

POSITIVEBELT®

Simplified conveyor design:

The POSITIVEBELT® is not only guided by self-tracking sprockets, but also be additionally guided within the sides of the conveyor. The belt tolerates transverse force, for such as lateral loading of products instance, without any risk of deviating.

An open overhanging design of the conveyor structure combined with the absence of belt tension facilitates regular mounting and dismantling tasks.

R31WUN20R174	Wheel	-	202	165	HDPE

The reinforced POSITIVEBELT® P01 is a version reinforced with aramid reinforcements.

It is particularly suitable for applications such as **roller drive**, requiring **good adherence**, a **high permissible load** even with **small widths**, while at the same time **eliminating the risk of slippage**.

The absence of a tensioning system lets you **retain fixed centre-to-centre distances**, **facilitating transfers between conveyors**.

Sprockets, wheels and discs: please enquire.

⁽¹⁾ Before 2016 : 30x4.5

The positive drive DEL/SYNC® is a **reinforced solid belt combining conveyance and synchronous drive with extreme precision** and hygiene.

It offers **excellent guidance** thanks to solid moulded teeth and **precise positioning** of the transported products.

The DEL/SYNC® is **reinforced with aramid reinforcements** that eliminate elongation.

Both the upper and lower surfaces are easy to clean and ensure **optimal hygiene**.

DEL/SYNC® also works with **small pulley diameters**.

Products in the DEL/SYNC® range offer a belt tailored **to different applications**. Consideration should be given to the need for adherence, pulley diameter, loads conveyed, length of conveyor...

A molded studded surface is available on request.

Synchronous shaped profiles can be fitted to the belt to ensure accurate indexing of the conveyed products.

Please enquire for any other temperature.

ACCESSORIES

PROFILES

- 2 types of profile: rounded and flat.
- The rounded base of the profiles makes belt cleaning easier and avoids bacterial development.
- Profiles can be high-frequency welded.*
- Flight supports can be used to reinforce the profiles for heavy loads.

* Except on the DEL/DRIVE® 50H belt and POSITIVEBELT® polyester, on which the profiles are hot fillet-welded.

Flight supports

FLAT PROFILES

T: THICKNESS (mm)	H: HEIGHT (mm)	MAX. WIDTH (mm)	MIN. PITCH (mm)
2	5 to 130	1050	Conveyor belt's pitch
3	5 to 130	1050	
4	5 to 130	1050	
5	5 to 130	1050	

Please enquire for other thicknesses.
DEL/SYNC®: Consult us.

ROUNDED PROFILES

T: THICKNESS (mm)	H: HEIGHT (mm)	MAX. WIDTH (mm)	MIN. PITCH* (mm)
6	10	1050	50
8	13	1050	50
9	14	1050	50
12	18	1050	50

*POSITIVEBELT® and DEL/SYNC®: Consult us.

SIDEWALLS

- For better containment of loose products.
- 20 to 80 mm high.
- Lateral trapezoid-shaped guides can be welded.
- The belt pulley diameter should be at least 2.5 times bigger than the height of the sidewalls.

ACCESSORIES

TROUGH CONFIGURATION

The flexibility and tension-free operation of the conveyor DEL/DRIVE® and POSITIVEBELT® belts allow special configurations that are not feasible with modular belts, such as trough configuration.

PERFORATIONS

Perforated belts facilitate drainage of transported products. Material can be perforated on request to varying diameters.

DRIVING DRUM

The driving drum on DEL/DRIVE® or POSITIVEBELT® belts reduces the footprint of conveyors and makes cleaning easier.

Solution 1: Smooth drum fitted with HDPE sprockets on stainless steel bushing (DEL/DRIVE® and POSITIVEBELT®).

Solution 2: Drum with profiled lagging in polyurethane (DEL/DRIVE®).

Solution 1

Solution 2

RETAINING CLIP

The retaining clip locks the sprockets, wheels and disks laterally on a square 40x40 mm shaft.

JOINING METHODS

BUTT WELDING

With sets of plates adapted for the tables, the welding tools for thermoweldable homogeneous belts can join DEL/DRIVE® 50, DEL/DRIVE® 25 and POSITIVEBELT® end to end while at the same time respecting the spacing.

Easy to handle, easy and quick to joint in the workshop and on site.

PRESS JOINTING

Serrated jointing of the DEL/SYNC®.
Cut with special tooling.
Compatible 5-bar press – Heating length 180 mm.

HOT AIR WELDING

Butt welding possible with welding seam.
Hot air welding also allows welding of profiles and belt repairs in situ in the event of snags.

MECHANICALLY FASTEN JOINS

The DEL/DRIVE® 50 and POSITIVEBELT® conveyor belts can be jointed with mechanically fasten joins in case of frequent mounting/dismantling or repairs.

The clips facilitate removal of the belt by removing the spindle between the 2 ends for quick dismantling and cleaning of the belt and conveyor.

STAINLESS STEEL CLIPS

- Removable joint comprising 2 half-clips with stainless steel spindle.
- For belts 1.5 mm to 5 mm thick.
- Suitable for all widths.
- Using normal mechanical fastening technics

PLASTIC CLIPS

- Suitable for all homogeneous (polyurethane or polyester) belts.
- Particularly suitable in metal detecting applications.
- Up to 1100 mm wide.
- Recommended for pulley diameter higher than 120 mm.

SCRAPER

The DEL/CLEAN scraper efficiently cleans the belt, ensuring permanent cleanliness of conveyor belts and avoids:

- clogging up the conveyor
- staining conveyed materials
- loss of materials

The DEL/CLEAN scraper offers many benefits:

- Small footprint
- No lateral misalignment
- Easy and quick to mount
- Can be adapted to existing or new installations
- Fits all types of conveyor belts
- Easy to clean
- Easier maintenance
- High resistance to hydrolysis: Ether base
- High resistance to abrasion: Ester base

The position of the scraper may vary depending on the need of recover the product.
